

Architectural BIM Project Manager

Midpoint CAD, LLC currently has an immediate opening for a BIM Project Manager for the Architecture, Interiors, Structural or MEP Engineering disciplines.

The ideal candidate should have exposure and working knowledge of BIM software such as Revit, ADT, Navisworks, SketchUp, & IES software tools. Also, has outstanding communication and presentation skills, is highly motivated, thrives in a frequently changing work environment, and possesses an entrepreneurial spirit and strong work ethic.

Our growth and expansion requires we find a motivated individual willing to lead the team. We offer a supportive environment for those genuinely wanting more from their careers. Our established and professionally recognized business offers an unparalleled opportunity for personal and professional growth.
